DETAILED ACTION

Applicants election of SEQ ID NO 4 is noted. Applicants also indicate that the invention of Group I, claims 1-9 and 22-26 has been elected, however, the previous restriction requirement set forth claims 1-9 in Group I and claims 22-26 in Group VIII. A new restriction requirement is set forth below with regard to the claims pending, claims 1-9 and 22-26, it is noted however, that the new restriction requirement places claim 22 in Group I.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 22, drawn to a polynucleotide, vectors and host cells comprising such, classified in class 536, subclass 23.1, class 435, subclass 320.1, and class 435, subclass 252.1, respectively.
 - II. Claims 23-26, drawn to a nucleic acid array, classified in class 435, subclass 287.2.
2. The inventions are distinct, each from the other because of the following reasons:

The inventions of groups I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because 1) the utility of a polynucleotide array does not necessarily depend on the utility

Art Unit: 1634

of each separate polynucleotide in the array, and 2) the polynucleotide array of Group II can be used in a method to identify differential expression of many different genes. The subcombination has separate utility such as the distinct polynucleotides of Group I can be used in recombinant methods to express proteins.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
